 - a) provide Council with an update of the City of Kalamunda's (City) Risk Profile consisting of the top ten reported risks at 30 June 2019 (Attachment 1); and
 - b) seek Council endorsement of the City's Risk Appetite Statement.
2. The City's Risk Profile has been prepared in accordance with the adopted Integrated Risk Management Plan (Plan). The Risk Profile outlines the top 10 ranked risks facing the organisation.

4. It is recommended Council:
 - a) endorse the Risk Profile and note the Strategic Risk Register (Attachment 2); and
 - b) endorse the City's Risk Appetite Statement (Attachment 3).

BACKGROUND

5. Risk management is a core component of corporate governance and an integral part of contemporary management practices. The Risk Profile has been adopted in accordance with the Integrated Risk Management Plan and is structured around *AS/NZS/ISO 31000:2018* and the requirements under the *Local Government (Audit) Regulations 1996*.

6. The management of risk is focused on:
- a) maintaining high levels of integrity for services provided by the City;
 - b) protecting the City's physical, and non-physical assets including employees, elected members, financial and property;
 - c) achieving and maintaining legislative and regulatory compliance, including codes of conduct and professional standards;
 - d) creating an environment where all employees assume responsibility for the proactive management of risk; and
 - e) demonstrating transparent and responsible risk management processes aligned to accepted best practice so as to address uncertainty and to deliver continuous improvement.
7. The Risk Profile captures those risks that are likely to:
- a) adversely impact the City's capacity to deliver current and future services;
 - b) have an organisational wide focus or impact;
 - c) have an adverse financial impact; and
 - d) result in significant reputational or political damage.

DETAILS

8. Risk management refers to the coordination of activities that direct and control the organisation with regard to risk. It is acknowledged risk management involves both the management of potentially adverse impacts together with the realisation of opportunities. Risk management is a focal element of the City's strategy to promote accountability through good governance and robust business practices, contributing to maintaining a sustainable organisation focused on the effective management of resources and operations.
9. In recognising that risk management is integral to good business practices, Enterprise Risk Management is comprised of the following elements:
- a) the City of Kalamunda's Risk Management Framework;
 - b) Risk Management Policy and Management Procedures;
 - c) Senior Management Team commitment to leading and championing risk management practices and thinking;
 - d) management systems to establish and report on the profile and treatment of risks; and
 - e) broad based training and awareness raising to enhance risk management understanding.
10. The purpose of risk management is the creation and protection of value. It improves performance, encourages innovation and supports the achievement of objectives. The following principles contained within (AS/NZS ISO 31000:2018) provide guidance on the characteristics of effective and efficient risk management and are the foundation for managing risk.
- These principles are:-
- a) Integrated – Risk Management is an integral part of all organisational activities.
 - b) Structured and comprehensive – contributing to consistent and comparable results.

- c) Customised – the Risk Management Framework and process are customised and proportionate to the organisations internal and external context relating to its objectives.
 - d) Inclusive – Appropriate and timely involvement of stakeholders enables their knowledge, views and perceptions to be considered.
 - e) Dynamic – Risks can emerge, change or disappear as an organisations internal and external context changes. Risk Management is responsive to those changes.
 - f) Best available information – inputs to risk management are based on current and historical information as well as on future expectations. Risk Management explicitly takes into account any limitations and uncertainties associated with such information and expectations.
 - g) Human and cultural factors – human behaviour and culture significantly influence all aspects of risk management at each level and stage.
 - h) Continual improvement – risk management is continually improved through learning and experience.
11. At the March 2019 Audit and Risk Committee meeting, Council adopted a revised Integrated Risk Management Plan which contained some modifications to the risk assessment matrix.
12. The City's Administration recently undertook a workshop to review and update the Strategic Risk Register. From the workshop, the Risk Profile was reviewed based on the top ten strategic risks likely to impact the City's ability to achieve its strategic objectives. Following endorsement by Council, the Administration will adopt the revised risk ratings in the ongoing assessment and reporting of risks.
13. The City's Strategic Risk Register has been developed so as to:
- a) identify any new risk events;
 - b) highlight risk trends between the current and previous years; and
 - c) identify priority treatment actions planned for the next 12 months.
14. The City has recently revised its Risk Appetite Statement as part of continuously improving its business practices. The Risk Appetite Statement, outlines the amount of risk that the City is willing to accept in pursuit of its strategic objectives.
15. The City's Risk Appetite is assessed against the main areas of risk consequence expressed with the Risk Management Plan.
16. The City's culture is focused on innovation and continuous improvement with a strong emphasis on enhancing service delivery, which may result in additional exposure to risk.
17. The City's risk appetite is generally higher when it can be demonstrated that the benefits created through innovation out-weigh the associated benefits.
18. Importantly, the additional risk exposure results in the City ensuring that risks are properly identified, evaluated and managed.

BACKGROUND

4. At the Strategic Retreat in February 2019 Councillors were presented with a combined policy review document along with summary of all policies that are now obsolete. Councillors were requested to review the documents and provide feedback on any policies they had concerns with, to date the City has not had any feedback and is now progressing the Policy review through to adoption.
5. The current Policy Manual exceeds 570 pages and includes 21 Council Policies, 26 Council Procedures, 22 City Policies and 25 City Procedures. All City Policies and Procedures have been removed from the Council Policy manual as they are operationally focused. There has also been a number of Policies that were no longer applicable to the business of the City or Council and are listed in Attachment 1 to be revoked.
6. The review has modernised and condensed the Council policy manual to approximately 90 pages and now includes 14 Governance and 13 Service Delivery Policies.
