Waste Bins

Recycling

How will recycling bin contamination be managed?

A site map must be included in all WMPs, showing the following:

Bin station locations
Bin arrangements, colour coded to show all waste and recycling streams
Dedicated bin/skip areas, including areas such as stallholder bins
Bin presentation point (for delivery, servicing and collection) with waste collection vehicle location shown
Location of emergency access ways, attendee entry points and designated areas, location of food vendors and other stalls, stages, liquor licensed areas, temporary structures and fences, staff areas, toilets, other activities, surrounding natural areas, waterways and roads.

STALL HOLDERS RUBBISH MUST NOT BE LEFT IN CITY BINS.

THE EVENT ORGANISER IS RESPONSIBLE FOR MAINTAINING ALL RUBBISH DISPOSAL.
